

"Even greater share growth"

One time in Central America. Every year a contest Federation of corn seed after winning the men's contest at one of the things they do that is unprecedented pace at which he won, he brought seeds recently won the competition for distribution to participants. competition and said "take this to the Federation of seeds planted . Then next year we come against the new "the following year he won the contest Federation of corn seed again. Like last year. His walk he recently distributed seeds Federation to win other then say "taken it and the next year we planted a new competitive," the man who won the contest six consecutive seed corn Federation times. And he distributed seeds to win the Federation to compete every other year. And the journalists asked him whether "it is easier or not. If they keep the good seed Federation without another break. He would have easily won every year, "he said," shows that you do not understand the cultivation of crops. Have you ever heard the word. The Federation became silk. If my farm is a good seed Federation. Accidental, but a neighbor's farm federations bad other seeds one day wind will blow out of the pollen grain to other federations bad fall in my farm. Make me bad seed with the Federation. It is good or wsan all federations have a good seed to compete at the same bunch who brought diligent watering the soil better, "said the words" If you have a good idea Federation seeds. You keep the option. Who does not share. One day the seed of the idea that Federation. Will die with you ".

Is important in life. The ideas and knowledge even further removed we get back and be part of making that person more successful along with the use of a valuable life in society.
